RECEIVED

'91 JUL 11 AIO:11

Dear Mr. Carcione:

EMERGENCY
RESPONSE

On July 1, 1991, I conducted an inspection at John Paul Enterprises to determine this facility's status and compliance with applicable state and federal hazardous waste regulations. Mr. Delmar Sybert represented John Paul Enterprises during the inspection.

During this site investigation, all facility operations were down for the undetermined amount of time. The site appeared to be closed. Review of operational records cannot be conducted at this time; findings of site investigations are as follows:

1. Ten 55-gallon drums of PCBs were found in Building G, the truck shop. All PCB waste generation is handled by Mr. Tom Buchan, Central Office, Ohio EPA--phone number: (614) 644-3068. You must contact Mr. Buchan within five days of receipt of this letter.
2. No violations of the Ohio Administrative Code were documented.

Failure to cite specific violations in this correspondence does not relieve John Paul Enterprises from complying with all applicable regulations, nor does it preclude this Agency from citing these violations in the future.

If you have any questions regarding this inspection, please call me at (513) 285-6357.

Sincerely,

George Nemore, Jr., R.S.
Division of Solid and
Hazardous Waste Management
